DIGIBLE Is Where

The Best of Both Worlds.

Combine

Rare physical collectible cards and NFTs. At Digible you'll be able to buy, sell or auction your rare cards and have the option to receive it in an NFT Format. All cards will be stored safely at our DIGISAFE HQ, and you can also redeem your physical card whenever you'd like, all through the palm of your hands using DIGITRACK.

At DIGIBLE There will Be Two Types of Marketplace

A marketplace which will be solely for physical rare collectible cards, as well as a marketplace for any artist to digitally sell or auction its NFT. The $DIGI Token will have a significant role in the Digible Platform. Please see below what Digible will offer.

DigiTrack

DigiTrack is where you control your physical card via our platform. You can choose for it to be stored at DigiSafe or you can sell it or auction it on our platform at a later date, maybe when the card appreciates? Totally up to you! All in a decentralized manner. Simply login with your wallet that your NFT is stored on and access your physical collection online! Once you sell your physical card, your NFT will get burned to eliminate any duplicate issues.

DigiGrade

DigiGrade is a service where Digible will inspect the card and also send the card to PSA which will is closely located near DigiSafe for official grading. Your card will be officially graded via PSA before it goes online at our marketplace.

Digi Auction

An auction feature will also be available at the marketplace with the requirement of users will have to hold a minimum of 3000 $DIGI. If a user would like to sell their physical card or NFT via an auction. The physical card would have to be sent to Digible, or if it is an NFT, the NFT will be locked on Digibles platform for the duration of the auction, and Digible will handle the transactions.

Fees

Digible has a 10% processing fee for any sale or auction held in the market places. 5% of the total fee will automatically go into the staking pool. The remaining 5% will go to Digible Operations for the future of Digible, in order for it to be sustainable as well as cover any expenses.

DigiStake

Stake your $DIGI & receive a share of what the platform generates!

DigiSafe

DigiSafe is where your valuable physical card will be stored if you chose for Digible to store it for you. All physical cards will be stored at DigiSafe securely. You will receive a digital version of your card which will be in a form of an NFT, of which you will be able to track details of your physical card at any given time.

DigiFarm

A DIGI/USDT Pair will be available, which users can provide liquidity in Uniswap then receive the LP Token.

DigiDuel

DigiDuel is where users can battle any desired NFT they hold in their wallets. Simply place your NFT & $DIGI tokens as a bet, and select a color of your choice. Once the the winning color is revealed, the winner will receive the losers NFT+ the amount of $DIGI that was placed as a bet. A 1% fee from the total bets will be taken. 0.7% will go towards the staking pool and 0.3% is burned.
